

## **“CHILDREN OF THE WORLD NOW”**

**For “Children of the World Now” – a 80-90-minute special television/theatrical show – we’ll contact former children filmed, in their home countries or anywhere they now live. We’ll travel to meet them and film them again, going back to their dreams and plans as children, compare them to the facts today... talk about now, talk about tomorrow... see how they now live, work... etc. Last time we met was about 20 years ago!**

### **“Children of the World” - It All Began...**

**I had the great pleasure and honor, in the years 1993-1996, to produce eleven half-hour episodes for the television series “Children of the World”. With supporting companies and organizations, and with our own investment, we traveled to 11 countries around the world. In each country we met several children, 3 to 13 old, filming them in their homes, their schools, hobbies, duties and games...**

**We joined some children of the world with other children of the world, showing each how they live, finding out what dreams and plans they had in their future. We gave these children opportunities to know each other and become friends...**

**Now – about two decades later – we want to return to these children, now adults, and compare their childhood plans and dreams to reality today. Perhaps, too, we could meet their children; find out what they wish to do when they grow up... So many fascinating questions and answers!**

**Thank you!**

**Best regards,**
